I changed one sentence

Relatively ~~Only~~ a few chemicals represented in the current literature have biological data adequate to support regulatory risk assessments, due primarily to experimental design and reporting issues. This limitation reinforces the need for systematic review

**Subject:** NexGen paper

We are ready to submit the NexGen paper which all of you saw and approved of in semi-final draft. Mary suggested that I attached the relevant emails acknowledging that you have seen it and it was acceptable; however, with the change-over in computers I am not able to access my archived emails at this time and the help desk cannot quite figure it out. If possible can you resend the acknowledging email or just send another one acknowledging that you have read the paper and its ok to move forward.

In case you want to look it over again, I have attached the final submission version. This version paper has also gone through clearance at FDA, DOD/ACE, NIH/NCATs and NIEHS.
